

AICORP

Consultants for Trade and Industry

Infrastructure, Engineering, Investment, and Financial Services

OUR HISTORY

Established in 2003, AICORP is a compliance and management consultancy firm specialising in infrastructure, engineering, financial services and also provide consultancy to other regulated or service-based sectors.

Aicorp has a team of consultants based in Myanmar, undertaking assignments primarily in Myanmar. We particularly have an unparalleled knowledge of Myanmar's emerging economy. We are currently identifying, advising and facilitating investments into projects in Myanmar.

OUR BUSINESS PRINCIPLES

Act at all times
in our client's
best interests.

Provide only practical
advice and services
for our clients.

Be proactive in identify-
ing opportunities, and
resolving key issues and
threats facing our
clients' businesses.

Maintain a stringent
policy of continuous
improvement.

Contribute cost-effective
solutions, combining
business focus with
efficiency.

Guarantee integrity in
our dealings with our
clients, staff, fellow
professionals, and the
general public.

Operate and deliver
services benchmarked
against the best in our
field.

WHY CHOOSE US?

OUR PEOPLE

We boast a competent team of consultants, who maintain registered advisor status. Coupled with their first-hand knowledge, our experienced consultants provide our clients with an informed insight into the Myanmar market.

TRUST AND TEAMWORK

When outsourcing any service, it is paramount for both parties to clearly understand what each expects of the other. We aim to work closely with each of our clients by earning their trust and respect, which we strongly believe will result in a fruitful partnership.

OUR SERVICES

Consultancy and Management

- Energy Sector
- Sustainable Energy
- Telecommunications
- Infrastructure

MIDDLE AND BACK OFFICE CONTROLS

AICORP understands that regulatory compliance is essential for a well-operated back and middle office. We regularly help our clients establish meticulous monitoring systems that can also be tailored to each firm's unique needs. This allows our clients to focus on their business without ever having to worry about compliance breaches.

Financial Resources Monitoring

AICORP helps clients understand how to structure their financial resources in ways required by regulators. This helps our clients avoid unnecessary capital lock-in, allowing them to reach their target financial objectives without delay.

COMPLIANCE SERVICES FOR PRIVATE EQUITY & VENTURE CAPITAL FIRMS

Fund Structure Advisory

The structure and location of a Private Equity Fund has major impacts on a firm's marketing, taxation, and regulatory considerations. We understand this, and help our clients consider their full range of options by obtaining specialist advice via our network of regulatory, legal, and taxation advisors.

We also have the experience and knowledge to advise firms who are in their start-up phase of development.

Investment Process

Having established the fund structure and location, we will help our clients chart out regulatory-compliant investment processes and procedures to ensure smooth operations.

Deal Making

Clear and compliant dealing arrangements will be planned for our clients to ensure smooth and regulatory-compliant transactions.

Application for Authorization

Having guided our clients through the various regulatory, organizational and operational issues, we will then assist our clients in applying for authorization by the relevant Financial Authorities. AICORP's wealth of experience in the area provides hands-on guidance and support throughout this process.

CONSULTANCY AND MANAGEMENT IN THE ENERGY SECTOR

AICORP understands that the energy landscape is evolving. Emerging technologies and growing demand is reshaping not only the kinds of energy we use, but also how we use them.

That is why AICORP collaborates with our energy industry clients to help them anticipate where the energy industry is headed and how they can then grow their businesses, addressing consumer and regulatory demands.

We have provided consultancy for a diverse range of clients including (but not limited to): Field operations, Gas Supply, Construction, Maintenance, Supply Chain, Sales and Marketing, and Customer Service.

TELECOMMUNICATIONS CONSULTANCY

A well-informed global network of consultants is crucial to helping firms stay competitive in the rapidly evolving telecommunications industry. With new technologies emerging every day, telecommunications firms must decide on the best way to leverage on these changes, increasing their network infrastructure, yet still delivering personalized experiences to each and every one of their customers.

AICORP's team of global partners and senior consultants work with telecommunications companies around the world, helping them to better understand their customers' needs and concerns, all while improving their existing communications networks. This builds the path to a strong and sustainable growth in the industry

We also help our clients understand their investor base to secure a strategy that attracts investors, giving them a competitive edge over other players in the industry. At the same time, we also have a unique understanding of the impact regulatory pressures can have on the industry. To that end, AICORP has considerable experience working with international clients and associations who seek to influence policies and regulations.

**UPCOMING
SERVICES**

Moving Forward

As Myanmar opens up her borders to the world, firms and businesses around the world are rushing to tap into Myanmar's markets and resources.

Here at AICORP however, we aim to move beyond just mere economic transactions. We hope to facilitate capital flow into the country to build up Myanmar's infrastructure, initiate economic development projects to provide financial assistance to the locals, as well as help provide them access to international markets for trade and commerce.

We hope to be at the forefront, and a part of Myanmar's anticipated entry into the global marketplace.

Banking

Banks are the cornerstone to a financially stable and prosperous country.

An exceptional credibility will facilitate the trust of businesses and the general public, encouraging strong capital flow.

Over the decades, Myanmar's banks have left its citizens feeling a general inability to trust the system, resulting in the hoarding of cash by individuals and businesses. This in turn has frozen up much of the economy.

AICORP is on track in obtaining a Full Banking License from the government. Our aim is to transform the banking landscape of Myanmar, providing a secure and reliable place for the public and the business community to deposit their funds. With our expertise in this area, we strongly hope to be able to grow with the people of Myanmar, as well as with the businesses in the country.

Agricultural Nutrients

The farming landscape today is growing ever more complex. Unpredictable weather, scarcity of resources, as well as the challenge of controlling pests and weeds are but some of the hurdles that farmers face.

AICORP is committed to working alongside key players in the agricultural industry to come up with innovative crop protective solutions. We aim to offer a broad range of smart solutions and a comprehensive portfolio of pesticides, fungicides, herbicides, fertilizers, and seed treatment.

AICORP's vision is to create sustainable farming practices in Myanmar, as well as to produce better crops and a greater yield.

Some products we have readily available*:

Urea N46

Potassium Sulphate

Ammonium Nitrate

NPK

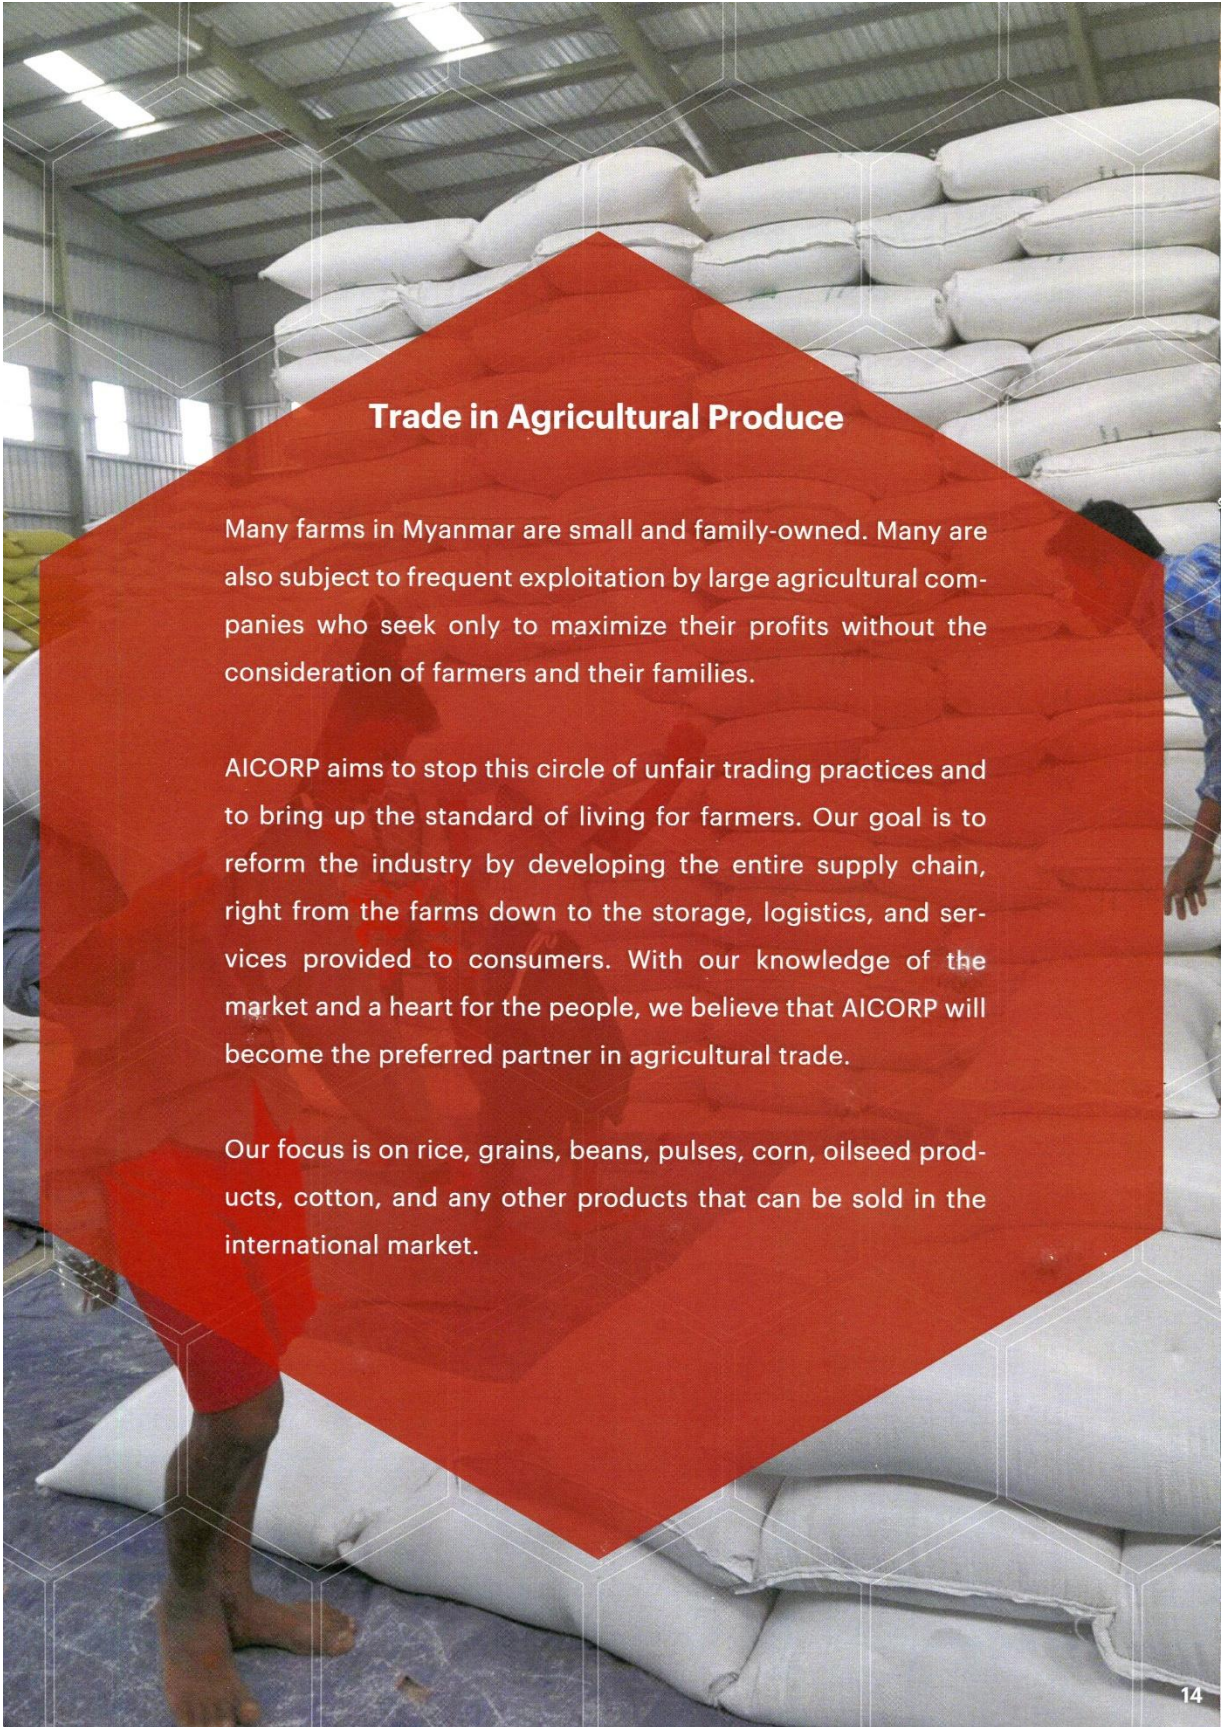

Calcium Sulphate

Potassium Nitrate

Ammonium Sulphate

Magnesium Sulphate

Granular Sulphur

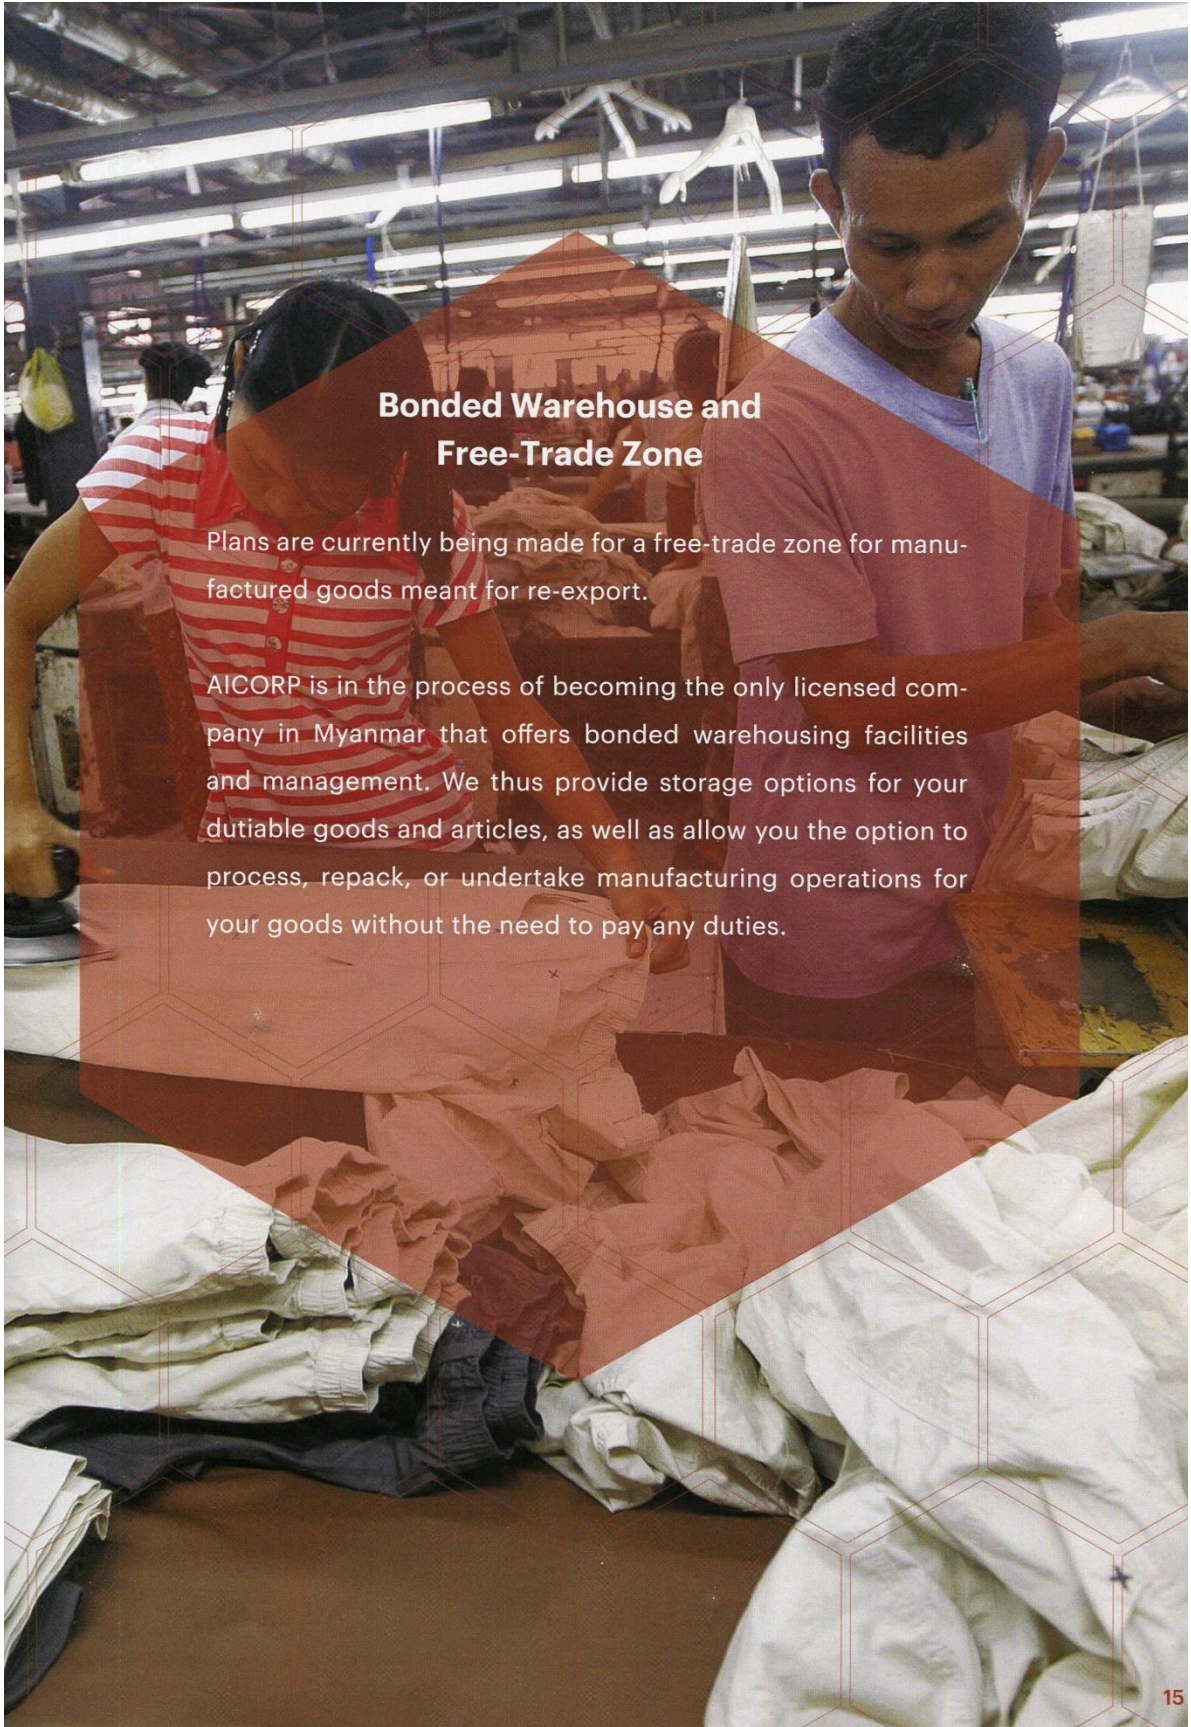

Trade in Agricultural Produce

Many farms in Myanmar are small and family-owned. Many are also subject to frequent exploitation by large agricultural companies who seek only to maximize their profits without the consideration of farmers and their families.

AICORP aims to stop this circle of unfair trading practices and to bring up the standard of living for farmers. Our goal is to reform the industry by developing the entire supply chain, right from the farms down to the storage, logistics, and services provided to consumers. With our knowledge of the market and a heart for the people, we believe that AICORP will become the preferred partner in agricultural trade.

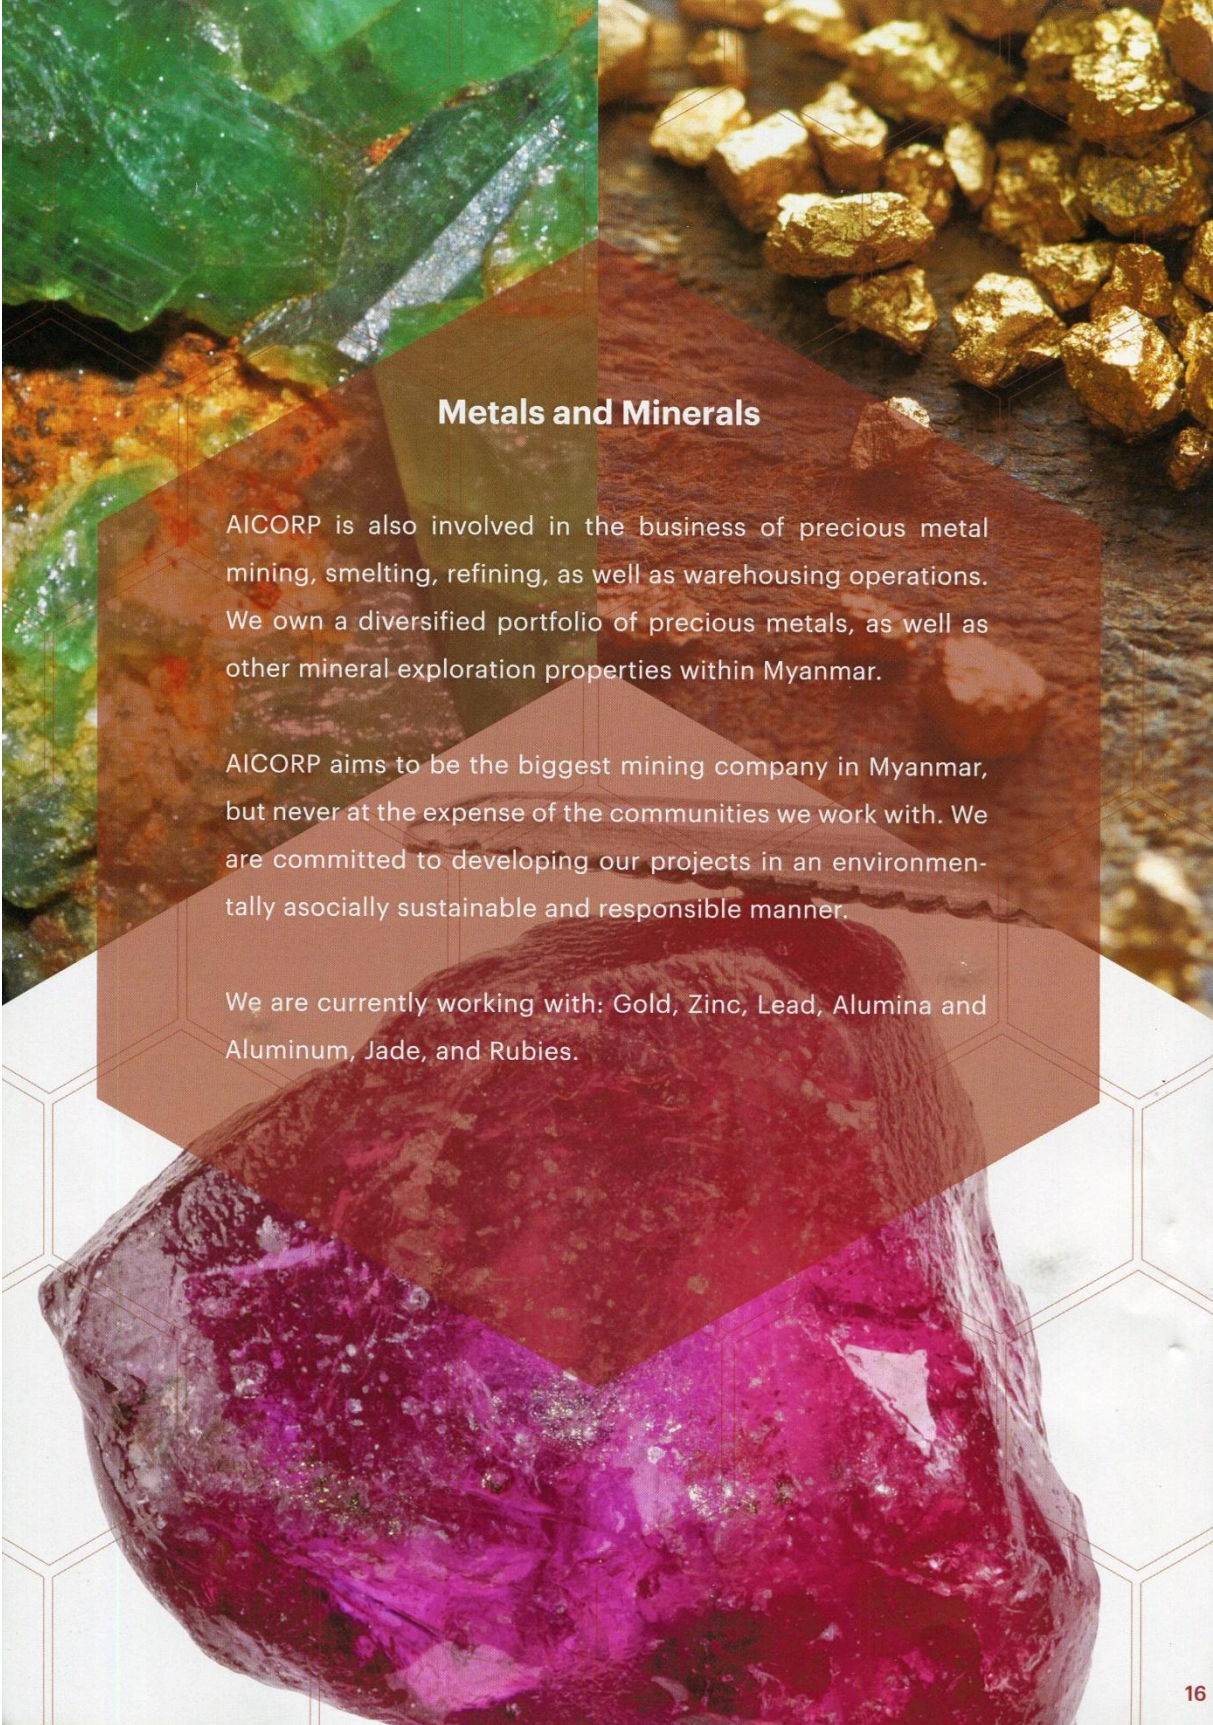

Our focus is on rice, grains, beans, pulses, corn, oilseed products, cotton, and any other products that can be sold in the international market.

Bonded Warehouse and Free-Trade Zone

Plans are currently being made for a free-trade zone for manufactured goods meant for re-export.

AICORP is in the process of becoming the only licensed company in Myanmar that offers bonded warehousing facilities and management. We thus provide storage options for your dutiable goods and articles, as well as allow you the option to process, repack, or undertake manufacturing operations for your goods without the need to pay any duties.

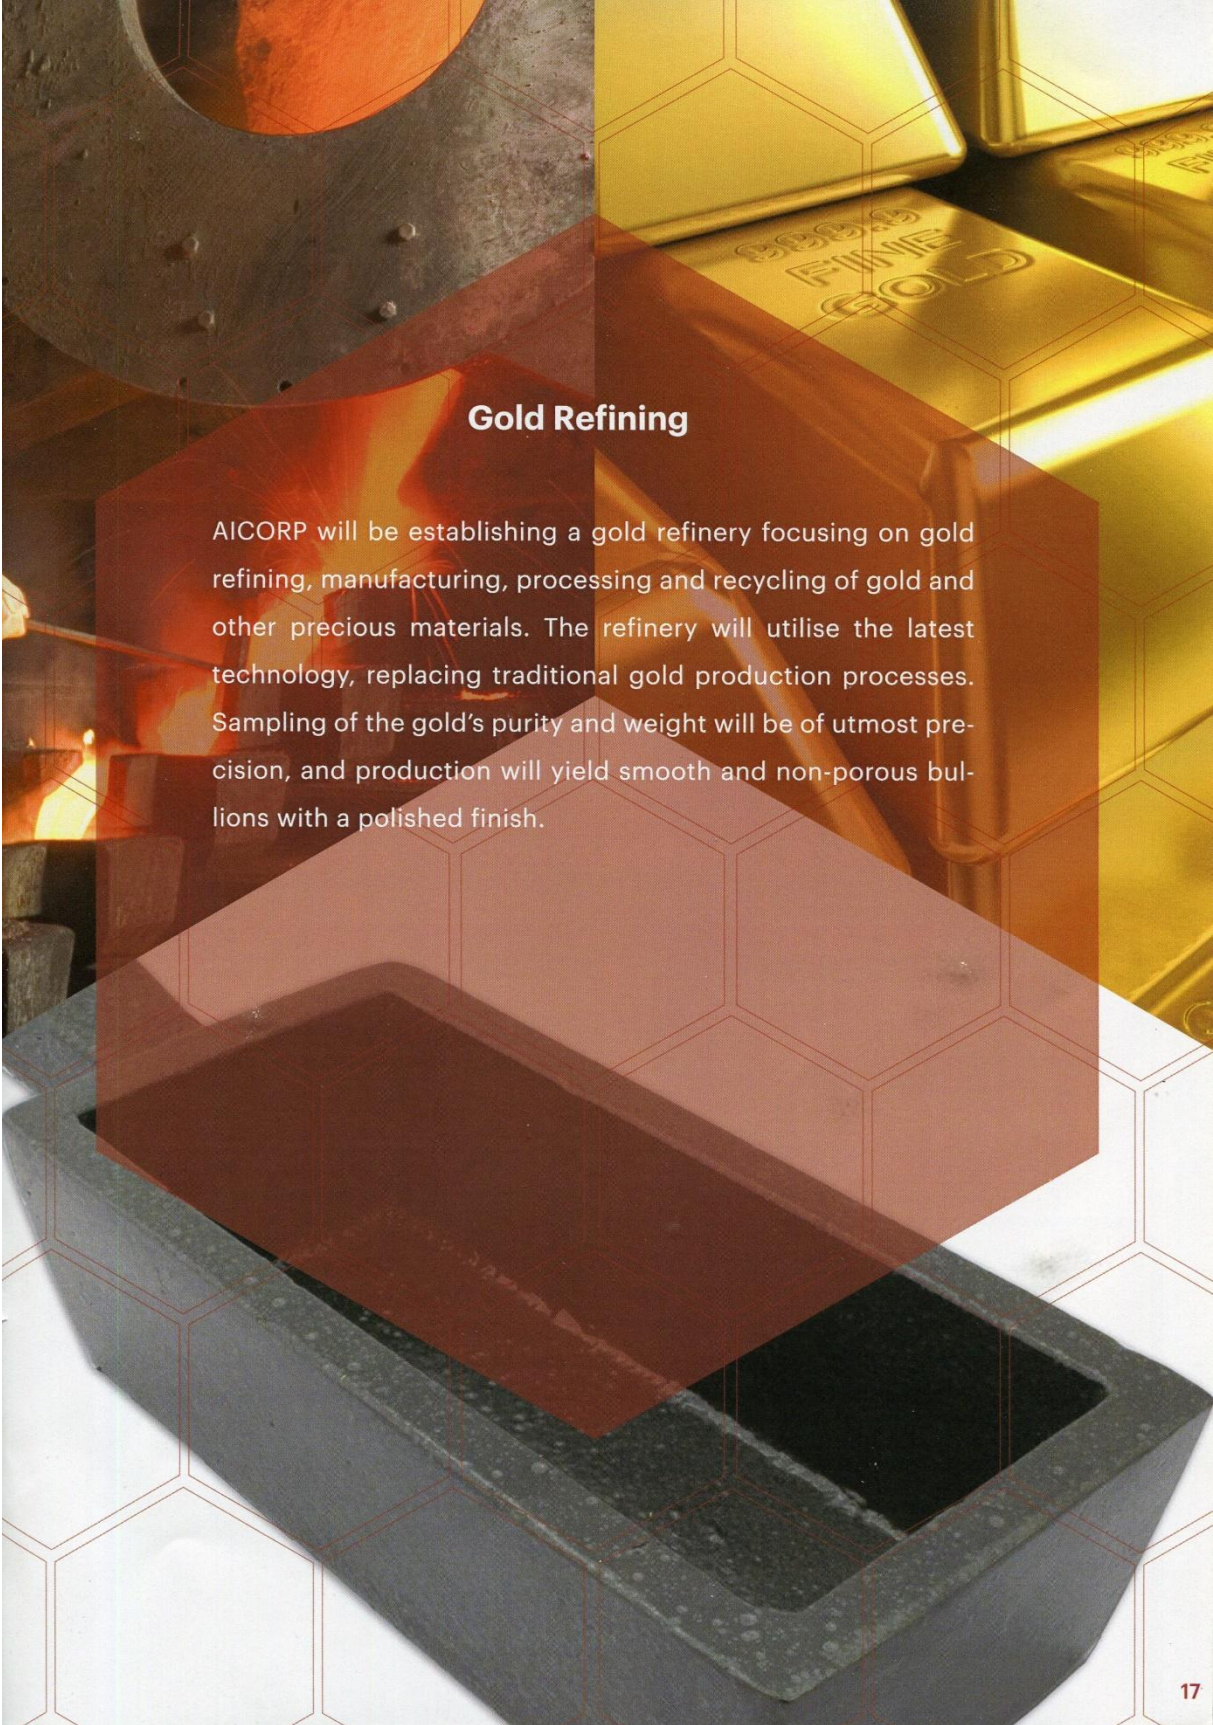

Metals and Minerals

AICORP is also involved in the business of precious metal mining, smelting, refining, as well as warehousing operations. We own a diversified portfolio of precious metals, as well as other mineral exploration properties within Myanmar.

AICORP aims to be the biggest mining company in Myanmar, but never at the expense of the communities we work with. We are committed to developing our projects in an environmentally, socially sustainable and responsible manner.

We are currently working with: Gold, Zinc, Lead, Alumina and Aluminum, Jade, and Rubies.

Gold Refining

AICORP will be establishing a gold refinery focusing on gold refining, manufacturing, processing and recycling of gold and other precious materials. The refinery will utilise the latest technology, replacing traditional gold production processes. Sampling of the gold's purity and weight will be of utmost precision, and production will yield smooth and non-porous bullions with a polished finish.

Gold Trading

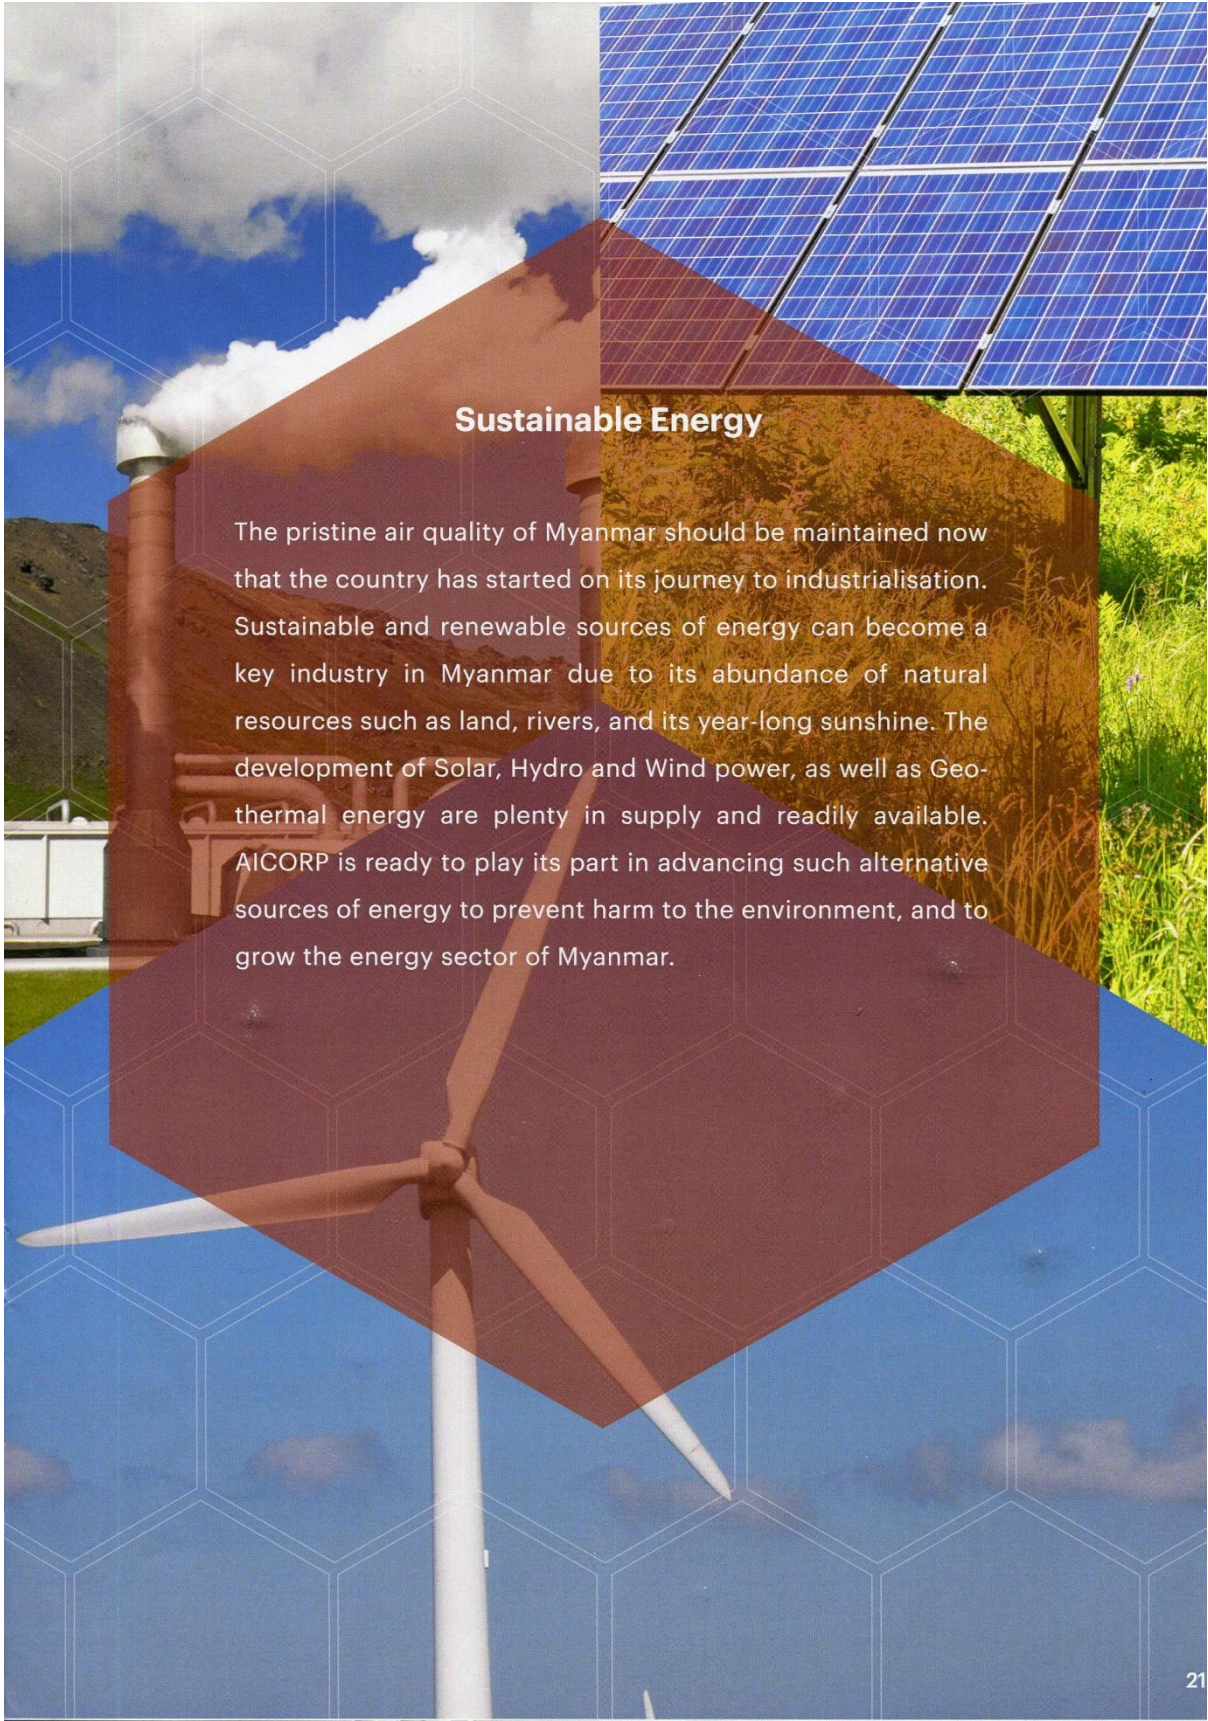

We offer competitively priced gold bullions which are perfect for low-risk investments and for jewellery production. The Gold Standard makes gold an excellent metal to invest in for diversifying your investment portfolio. It is recommended that gold bullions used for investment should contain approximately 99.99% pure gold, and here at AICORP, you can be assured that your gold bullions will always meet this requirement.

Infrastructure Development

There are many potential areas for development in Myanmar: from deep sea ports to highways, railway corridors, bridges, power plants, urban infrastructure, schools and hospitals – a well-developed infrastructure will certainly spearhead Myanmar's economic progress.

AICORP aims to lead the way in reshaping Myanmar's landscape, paving the way in reshaping and reinventing the land. As such, we invite you to join us in investing in Myanmar's future, one infrastructural development at a time.

Sustainable Energy

The pristine air quality of Myanmar should be maintained now that the country has started on its journey to industrialisation. Sustainable and renewable sources of energy can become a key industry in Myanmar due to its abundance of natural resources such as land, rivers, and its year-long sunshine. The development of Solar, Hydro and Wind power, as well as Geothermal energy are plenty in supply and readily available. AICORP is ready to play its part in advancing such alternative sources of energy to prevent harm to the environment, and to grow the energy sector of Myanmar.

Gases: LPG & LNG

AICORP is passionate about energy and the society we intend to serve. We pride ourselves in providing cleaner burning fuels for homes and businesses, and have carved a name for ourselves in the market having delivered quality LPG (liquefied petroleum gas) and LNG (liquefied natural gas) to our customers at competitive prices.

Years of experience in the distribution of gases have alerted us to the importance of a dynamic approach in the distribution of gases. As such, we focus on LPG and LNG due to their wide range of uses. LPG for instance, in being produced from both oil and gas can be used for: cooking, heating, auto fuel source, aerosols, crop drying, emergency generators, industrial boilers, burners and kilns, just to name a few.

LNG on the other hand, is an odorless, non-toxic, non-corrosive gas that can be used for: alternative fuel source for vehicles and more, power generation, boilers, and for the mining industry. It also produces low carbon emissions, and generates electricity more efficiently than coal or oil.

Fuels and Bitumen

AICORP also offers a diverse range of premium quality fuels for automotive, aviation, and marine industries. Our years of serving the transportation, logistics and construction sectors have given us the experience needed to deliver reliable products alongside support services to keep our customers' operations running.

Automotive Diesel Fuel

Our diesel is a special light-distillate fuel suitable for high-speed diesel engines, and is especially useful for services involving frequent variations in loads and speeds. It is formulated to deliver maximum lubricity to help protect fuel pumps and injectors from wear and tear.

TYPICAL APPLICATIONS:

- Industrial Purposes
- Modern Ignition Engines

Petroleum

AICORP is a renowned petroleum exporter involved in the supply of an excellent selection of quality oils and fuels.

Wax Emulsion

Wax emulsion is commonly used in aqueous formulations in many manufacturing processes, being ready-to-use and easily incorporable into formulations without elevating its temperature. AICORP works with many specialized wax emulsion producers dealing with construction boards, paper-coating, flexible packaging, fiber composite, and many other areas.

FUELS

- Kerosene
- Diesel
- Extract Fuel Oil
- Light Fuel Oil
- Heavy Burner Fuel Oil
- Aircraft Fuel

BASE OIL

- SN 150
- SN 300

LUBRICANTS

- Engine Oil
- Hydraulic Oil
- Transformer Oil

BITUMEN

- Bitumen Grade 60/70
- Bitumen Grade 80/100

RUBBER PROCESS OIL

- Aromatic Rubber Process oil
- Paraffin Rubber Process oil
- Naphthenic Rubber Process oil

Jet Fuel

We also have extensive aviation sales marketing experience in Asia. Besides having served customers in Singapore, AICORP has also marketed and supplied jet fuel to other international customers in the aviation industry, being known for supplying quality aviation fuels that meet the latest specifications at competitive prices.

Kerosene

AICORP also supplies quality Kerosene at highly competitive prices. Kerosene is the perfect heating fuel for both commercial and domestic purposes. Kerosene is also known as: **Burning Oil, Heating Oil, Boiler Oil and Standard Kerosene.**

Bitumen

AICORP exports and distributes bitumen of the highest quality and standards in the regional markets. Our bitumen is often used in road construction, water-proofing, building pavements, etc.

We supply Bitumen Emulsions, as well as Bitumen in multiple grades such as:

- 60/70
- 80/100
- MC30
- MC70
- MC3000

Please feel free to contact us should you have further enquiries.

Light and Heavy Fuel Oil

Fuel oils are used as fuel for power generation, marine bunkers and large industrial heating plants and burners.

Light Fuel Oil
Typical Specification

PROPERTY	UNITS	METHOD	TYPICAL
Appearance	Visual		Dark Brown
Density @ 15°C	kg/L	ASTM D1298	0.8 max
Flash Point - PMCC	°C	ASTM D93	>42.0
Kinematic Viscosity @ 40°C	cSt	ASTM D445	14 max
Moisture	% v	ASTM D6304-07	<1.0
Calorific Value	MJ/kg	ASTM D240-02	>40
Sulphur	% wt	ASTM D129	<2.0
Ash Content	% wt	ASTM D482	<1.0
Micro Carbon Residue	% wt	ASTM D4530	<3.0

Light and Heavy Fuel Oil

Fuel oils are used as fuel for power generation, marine bunkers and large industrial heating plants and burners.

Heavy Fuel Oil
Typical Specification

Property	Units	Method	Limit	Typical
Appearance		Visual	Black	Dark brown / black liquid
Density @ 15°C	kg/L	ASTM D 129-99	0.90 min	0.95
Flash Point - PMCC	°C	ASTM D93-08	65 min	130.0
Kinematic Viscosity @ 40°C	mm ² /s	ASTM D445-06	320 max	193.0
Moisture Content	% w/w	ASTM D4377-00	1.0 max	0.9
Pour Point	°C	ASTM D97	Report	<-6
Sulphur	% w/w	ASTM D4951-06	Report	<3.0
Ash Content	% w/w	ASTM D482-07	4.0 max	1.785
Carbon Residue	% w/w	ASTM D4530-07	Report	6.1
Gross Calorific Value	MJ/kg	ASTM D240-02	38 min	43

A photograph of laboratory glassware, including a graduated cylinder and several beakers, set against a background of a hexagonal grid pattern. The grid is semi-transparent and overlaid on a blue-tinted image of the glassware. The graduated cylinder is in the center, with markings for 10, 20, 30, 40, and 50. The beakers are positioned around it, some containing liquid. The overall aesthetic is scientific and technical.

Chemicals

AICORP provides a large variety of hydrocarbon chemicals and solvents for specialized uses. We distribute chemicals ranging from common everyday chemicals to hard-to-find chemicals for applications such as paint thinning and purging, metal degreasing, and the cleaning of plastic and fiberglass, just to name a few*.

Please feel free to contact us if there is something specific that you are looking for – our team of professionals are ready to advise and customize products according to your needs.

*For more product information, please refer to the next page.

Chemical Solvents

AICORP offers a large variety of hydrocarbon chemicals and solvent for specialised uses. We distribute a large range of chemical products for a variety of applications such as paint thinning, paint purging, metal degreasing, and the cleaning of plastic and fiberglass.

ALIPHATIC SOLVENTS

- Low aromatic White Spirit
- Hexane
- Hexan Polymer
- SBP 80/110
- SBP 60/145
- Pentane 60/40
- Pentane 80/20

ACETATES

- Ethyl Acetate
- Normal Butyl Acetate

KETONES

- Acetone
- Methyl Ethyl Ketone
- Methyl Isobutyl Ketone
- Diacetone Alcohol

GLYCOLS

- Ethylene Glycol Monobutyl Ether
- Ethylene Glycol Mono-Ethyl Ether Acetate
- Butyl Glycol

AROMATIC SOLVENTS

- Toluene
- Xylene
- Solvent 100
- Solvent 150

ALCOHOLS

- Methanol
- Isopropyl Alcohol
- Normal Butyl Alcohol
- Iso-Butanol
- Industrial IPA

to use.
